Use the Medical Insurance Price Prediction

Links to an external site.

dataset from Kaggle to predict medical insurance costs. You must include:

- Feature normalisation
- Linear regression with one feature
- Multiple linear regression
- Deep neural network (DNN) - single feature
- Deep neural network (DNN) - multiple features
- Performance comparison using metrics such as mean absolute error (MAE)
- Visualisation of predictions from the best-performing model

Please submit your completed code on Canvas > Assignments.
